Professional Summary

Software Engineer with 6 months of internship experience building **full-stack** applications (**frontend** and **backend**) for a salon management **SaaS platform** on the **MERN stack**. Strong in **backend**, **RESTful APIs** and **system design**, improving booking efficiency by **30%** and customer retention by **20%**. Built **Generative AI** systems using **RAG**, **LangGraph** and **MCP**.

Education

Chandigarh University — **Mohali, Punjab**
B.E. in Computer Science — ***2021 – 2025***

Technical Skills

Languages:	C++, JavaScript, Python
Backend:	Node.js, Express.js, RESTful APIs, JWT Authentication, BullMQ, Apache Kafka, Microservices
Databases:	MongoDB, Redis, MySQL, PostgreSQL, Vector Databases
Generative AI:	LangChain, LangGraph, RAG, MCP, Agentic AI
Frontend:	React.js, Next.js, HTML5, CSS3, Tailwind CSS
Tools:	Docker, Git/GitHub, Render, Vercel, Streamlit, Postman
Core CS:	Data Structures & Algorithms, Object-Oriented Programming (OOP), System Design, DBMS

Work Experience

Zylu Business Solutions Pvt. Ltd. — ***Remote***
Full Stack Developer Intern — ***May 2025 – Oct 2025***

- Contributed to full-stack development of a salon management **SaaS platform** using the **MERN stack** (MongoDB, Express.js, React.js, Node.js), improving booking efficiency by **30%** and customer retention by **20%**.
- Implemented **role-based access control (RBAC)** for **3 user roles** (owners, staff and clients) with authorization checks on protected API endpoints.
- Designed and integrated **RESTful APIs** for booking management, user authentication and payment processing, preventing double bookings with **MongoDB** concurrency control.
- Optimized **MongoDB** queries, reducing backend latency by **15%**, and resolved frontend and backend bugs to improve application stability.

Projects

Relay: AI Workflow Orchestrator | GitHub | Live Demo — ***Sep 2026 – Oct 2026***
Full-Stack AI Workflow Automation Platform

- Architected an **AI workflow automation platform** similar to n8n, with a drag-and-drop **React Flow** builder, **7 node types** and **6 built-in workflows** (order refund, expense approval, incident escalation). Low risk cases are approved automatically and only high risk cases are routed to humans, reducing manual review load.
- Designed async execution with **BullMQ + Redis** workers. Steps persist to **MongoDB** before advancing, so crashed workers **resume from the last completed step** via **idempotency keys** with no duplicate side effects.
- Enforced **human approval gates in the engine**, validated AI output with **JSON schemas**, and added an AI adapter supporting Groq, OpenAI and Gemini along with **JWT** multi-tenancy. **Dockerized** and deployed on **Render** and **Vercel**.

Meeting Intelligence Platform | GitHub | Live Demo — ***Jul 2026 – Aug 2026***
AI Meeting Transcription and Q&A Assistant

- Built a meeting analysis tool that transcribes, summarizes and answers questions on video or audio in **under 30 seconds**, handling **500 MB+ files** with support for English and Hinglish.
- Built with **OpenAI Whisper**, **Mistral AI** and a **LangChain LCEL** RAG pipeline over **ChromaDB**. Deployed on **Render**, resolving Python version conflicts and free tier memory limits.

AI Resume Screening Agent | GitHub | Live Demo — ***May 2026 – Jun 2026***
LangGraph Based Resume Matching and Ranking System

- Automated HR screening that evaluated **100+ candidates in under 2 seconds** with **95% semantic matching accuracy**, **40x faster** than manual review.
- Built a **LangGraph state machine** with 6 nodes (JD parsing, skill extraction, vector search, ranking) using **ChromaDB** and **Groq LLaMA 3.3 70B**, plus an HR chatbot with LLM routing.

Certifications

- **Claude with the Anthropic API**, Anthropic — LLM integration, structured outputs, function calling
- **AI Fluency: Framework & Foundations**, Anthropic — Responsible AI, ethical deployment
- **Introduction to Generative AI - Art of the Possible**, **AWS** — Generative AI fundamentals, use cases, risks and benefits
- **Advanced React.js Development**, Infosys Springboard — Component architecture, hooks, state management
